

Tougher than your ex-wife's attorney.

There ought to be a law against lids this tough

Ask our competition. Adding insult to injury, our prices are really low. CSI's exclusive, blow molding technology allows us to make lids with double-wall toughness, quickly and precisely so they last up to twice as long as rotomolded lids. No wonder so many leading

manufacturers and waste haulers are choosing CSI lids: they are extremely durable, even under extreme conditions. CSI double wall lids can take the heat, the cold, and the crushing blows of hopper attacks. Bottom line: you'll replace CSI lids less often.

Stop replacing so many lids.
